

Quick Guide to Light Bulb Disposal in San Francisco

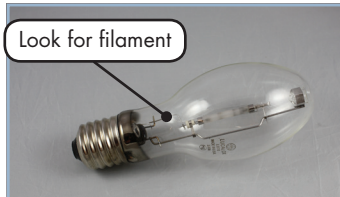

Hazardous Waste: Do not place in any carts, bins or dumpsters.

The following lighting elements contain toxic metals, including mercury, which is harmful to human health and the environment – even in very small quantities. To find out how you properly dispose of light bulbs with mercury, go to SFEnvironment.org/RecycleWhere

Compact Fluorescent Lights (CFLs) and Fluorescent Tubes

High Intensity Discharge (HID) contain tube filaments

Neon Signs

LED

Trash: Residents and businesses can put these items in the black landfill bin.

These items are not hazardous waste light bulbs, so they can be put in the black landfill bin.

Incandescent

Halogen
